Chorus Sound Processor

HEAR ALL DAY ANYWHERE

Upgrade your C1 patients to Chorus today.

A Sonova brand

Five Reasons to Upgrade Your C1 Patients Today

ALL DAY ON A SINGLE BATTERY CHARGE

The new Lithium-ion rechargeable battery has been designed to give Chorus™ recipients the confidence to go all day on a single charge.

EXCELLENT SPEECH UNDERSTANDING IN NOISE

The fully integrated Roger receiver gives access to all Roger microphones, including Roger Select™, Roger Table Mic II, Roger™ Pen, and the Roger™ for Education portfolio.

THE CONFIDENCE TO TAKE IT ANYWHERE THEY WANT

The dedicated Protective Case is ideal for any environment with excessive water, mud, and dirt.

SMALLER AND LIGHTER

Thanks to the reduced dimensions, Chorus provides additional comfort: it's smaller than its predecessors (7% vs Platinum; 28% vs S-Series) and lighter (17% vs Platinum; 33% vs S-Series).

ONE SOFTWARE TO FIT THEM ALL

No need to use different software anymore. With the introduction of Chorus, you can say goodbye to the old SCLIN software and fit all your patients with the easier to use SoundWave™ 3.2.

Upgrade your patients now.
